

636 Watt, 12 Volt, Medical Safety Certified
Single Output Power Supply with PFC

UNIT CODE	DESCRIPTION
MED-PS 600-12V	636 Watt, 12 Volt, Single Output, MOOP Level Medical Power Supply with PFC Function

SPECIFICATIONS		
AC Input	DC Output	Approvals
Universal AC input 85 ~ 264V	+12VDC @ 0 ~ 53A	

Features at a Glance:

Medical safety certified, MOOP level
 Low leakage current <300µA @ 264VAC
 No load power consumption < 0.8W
 Built-in active PFC function, PF>0.94
 Protection: Short circuit, Overload,
 Over voltage & Over temperature
 Built-in: Constant current limiting circuit;
 Remote Sense function; Remote ON-OFF
 control, DC OK signal; 5V/0.3A standby output;
 Long Life Cooling fan with ON-OFF control
 105°C long-life electrolytic capacitors
 Certificates: UL / CUL / CB / CE
 Safety standards: ANSI/AAMI ES60601-1,
 IEC60601-1 approved
 EMI: Class B level compliance
 (see following pages for complete EMI/EMC details)
 MTBF: 138.7K hrs min. MIL-HDBK-217F (25°C)
 Case: 977A
 Weight: 3.46 lbs (1.57 Kgs)
 Dimensions: 8.58 x 4.13 x 2.5 inches (LxWxH)
 218 x 105 x 63mm (LxWxH)
 5 year warranty

The MED-PS 600 series are high power and highly reliable power supplies designed to meet the rigorous demands of the medical device and equipment market. These are 600 Watt, efficient AC/DC enclosed MOOP level medical type power supplies that comply with international medical safety regulations.

Standard functions include built-in remote ON/OFF control, protections for short circuit, overload, over voltage, and over temperature. Additionally, with low leakage current ($\leq 300\mu\text{A}$) and low *no-load* power consumption (<0.8W) meet "green mode" requirements. This series meet the high quality requirements for medical applications and are an excellent choice for *non-patient* contact instruments and equipment. Global certificates of compliance meeting UL/ CUL/ CB/ CE medical safety requirements ensure users' safety. EMI, Class B Level, compliant.

Suitable applications include medical and diagnostic equipment requiring low leakage current such as lab and analysis equipment, monitoring equipment, MRI & X-ray machines, CT Scanners, chemical or biological detection equipment, as well as any system requiring low leakage current and/or low, no-load, power consumption.

Release & Application Notes

POLLOCK INDUSTRIES, INC. 81 Butternut Road, White River, VT 05001
 toll-free 1-866-665-5434 (603) 888-2467 sales@pollock.biz

■ Features :

- Universal AC input / Full range
- Built-in active PFC function, PF>0.94
- High efficiency up to 89%
- Withstand 300VAC surge input for 5 seconds
- Protections: Short circuit / Overload / Over voltage / Over temperature
- Medical safety approved (MOOP level)
- Built-in cooling fan ON-OFF control
- Built-in DC OK signal
- Built-in remote ON-OFF control
- Standby 5V@0.3A
- Built-in remote sense function
- No load power consumption<0.8W (Note.7)
- Current sharing up to 2400W (3+1) (24V,36V,48V)
- 5 years warranty

EMC IMMUNITY	Compliance to EN61000-4-2,3,4,5,6,8,11, EN60601-1-2								
OTHERS	MTBF	138.7K hrs min. MIL-HDBK-217F (25°C)							
	DIMENSION	218*105*63.5mm (L*W*H)							
	PACKING	1.57Kg/8pcs/13.6Kg/1.34CUFT							
NOTE	<ol style="list-style-type: none"> 1. All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature. 2. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1µf & 47µf parallel capacitor. 3. Tolerance : includes set up tolerance, line regulation and load regulation. 4. The power supply is considered a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to EMI testing of component power supplies. (as available on http://www.meanwell.com) 5. Derating may be needed under low input voltages. Please check the derating curve for more details. 6. Length of set up time is measured at first cold start. Turning ON/OFF the power supply may lead to increase of the set up time. 7. No load power consumption<0.8W when RC+ & RC- (CN100 pin3,4) 0 ~ 0.8V or short. 8. When the input voltage is less than 40VAC, the SPS may exhibit degradation of performance. The final product manufacturers must re-confirm this deviation that does not affect basic safety or essential performance.

Block Diagram

Derating Curve

Output Derating VS Input Voltage

Function Description of CN100

Pin No.	Function	Description
1	AUXG	Auxiliary voltage output ground. The signal return is isolated from the output terminals (+V & -V).
2	AUX	Auxiliary voltage output, 4.75-5.25V, referenced to pin 1(AUXG). The maximum load current is 0.3A. This output has the built-in oring diodes and is not controlled by the "remote ON/OFF control".
3	RC+	Turns the output on and off by electrical or dry contact between pin 4 (RC-), Short: Power OFF, Open: Power ON.
4	RC-	Remote control ground.
5	CS	Current sharing signal. When units are connected in parallel, the CS pins of the units should be connected to allow current balance between units.
6,8	GND	This pin connects to the negative terminal(-V). Return for DC-OK signal output.
7	DC-OK	DC-OK signal is a TTL level signal, referenced to pin8(DC-OK GND). High when PSU turns on.
9	+S	Positive sensing. The +S signal should be connected to the positive terminal of the load. The +S and -S leads should be twisted in pair to minimize noise pick-up effect. The maximum line drop compensation is 0.5V.
10	-S	Negative sensing. The -S signal should be connected to the negative terminal of the load. The -S and +S leads should be twisted in pair to minimize noise pick-up effect. The maximum line drop compensation is 0.5V.

Function Manual

1. Remote Sense

The remote sensing compensates voltage drop on the load wiring up to 0.5V.

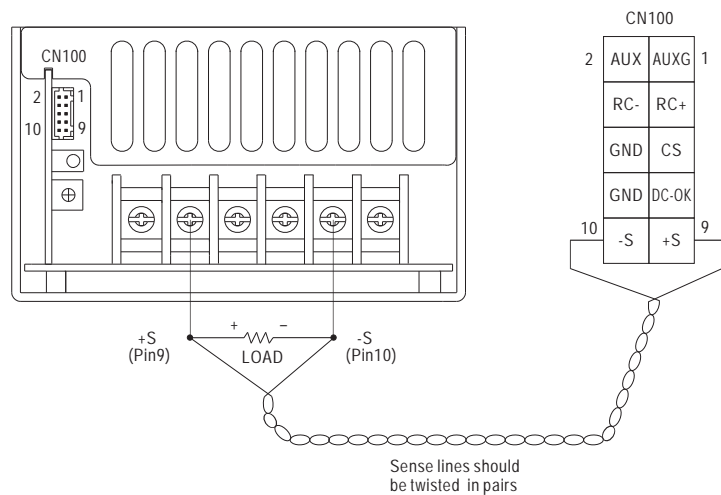

Fig 1.1

2. DC-OK Signal

DC-OK signal is a TTL level signal. High when PSU turns on.

Between DC-OK(pin7) and GND(pin6,8)	Output Status
3.3 - 5.6V	ON
0 - 1V	OFF

Fig 2.1

3. Remote Control

The PSU can be turned ON/OFF by using the "Remote Control" function.

Between RC+(pin3) and RC-(pin4)	Output Status
SW ON (Short)	OFF
SW OFF (Open)	ON

Fig 3.1

4. Current Sharing with Remote Sensing (Only for 24V, 36V and 48V)

MSP-600 has the built-in active current sharing function and can be connected in parallel to provide higher output power :

- (1) Parallel operation is available by connecting the units shown as below.
(+S, -S, CS and GND are connected mutually in parallel).
- (2) Difference of output voltages among parallel units should be less than 2%.
- (3) The total output current must not exceed the value determined by the following equation.
(output current at parallel operation) = (Rated current per unit) × (Number of unit) × 0.9
- (4) In parallel operation 4 units is the maximum, please consult the manufacturer for applications of more connecting in parallel.
- (5) The power supplies should be paralleled using short and large diameter wiring and then connected to the load.

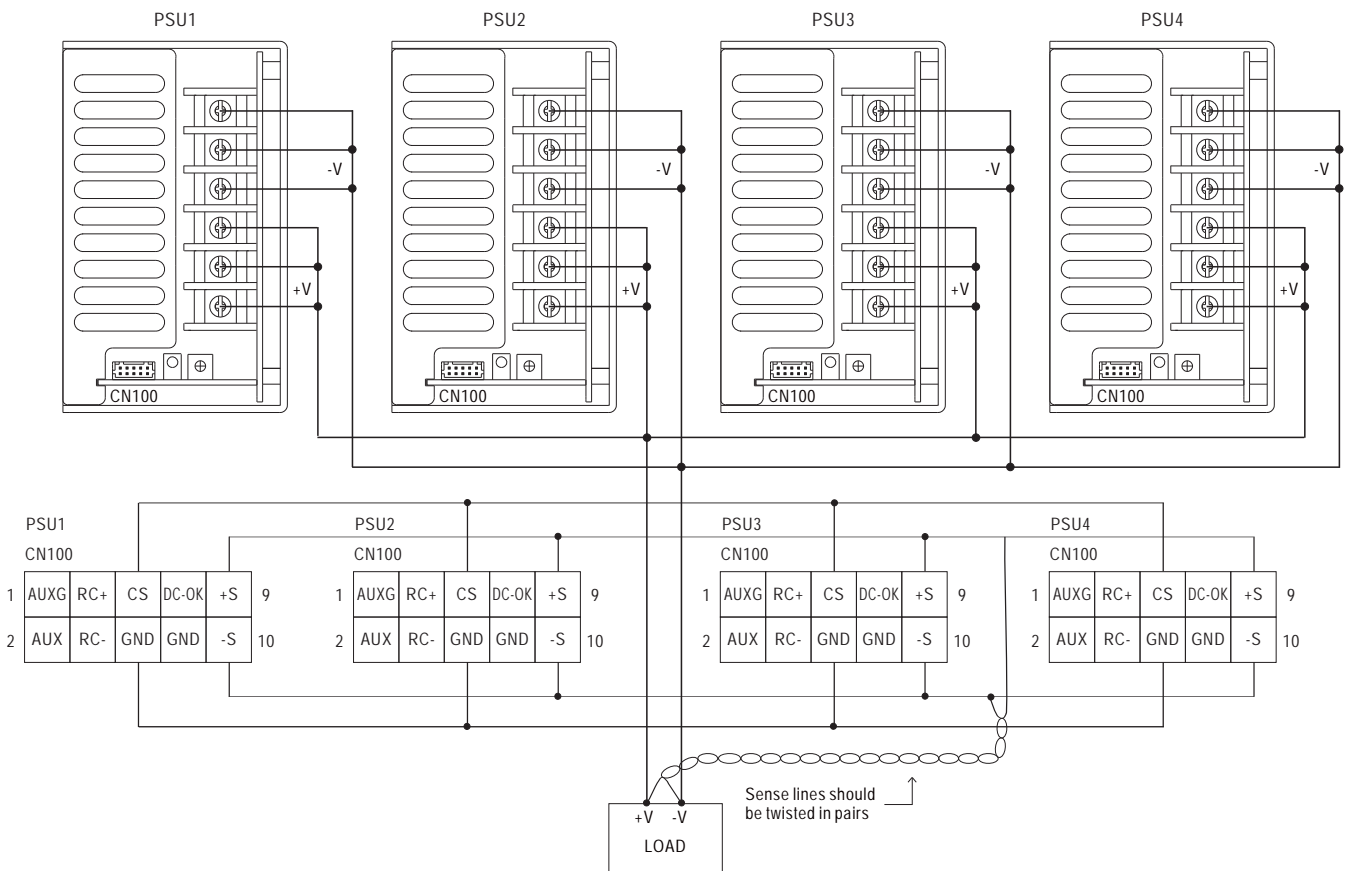

Fig 4.1

Note : 1. In parallel connection, maybe only one unit (master) operate if the total output load is less than 2% of rated load condition.
The other PSU (slave) may go into standby mode and its output LED and relay will not turn on.
2.2% min. of dummy load is required.
